

MISSISSIPPI STATE UNIVERSITY™
COLLEGE OF VETERINARY MEDICINE

Veterinary Medical Technology Full Time Instructor Position

The Mississippi State University Veterinary Medical Technology Program is excited to have the opportunity to welcome a new member to our team!

The program was established in 2010, received initial accreditation in 2012, was elevated to full accreditation in 2017, and remains in good standing with the CVTEA to date. There have been 215 graduates of the program since its inception.

Our program is a Bachelor's degree program, and it is one of only a few BS programs housed within a College of Veterinary Medicine. Being housed within the College of Veterinary Medicine allows for instructors in the program to have access to state-of-the-art teaching technology and equipment; and it allows our students have the unique opportunity to train alongside the DVM students. This unique arrangement allows the program to produce high quality, career ready graduates.

We are currently looking for a CVT or DVM that has interest and experience in the education setting. The individual hired to this position will instruct veterinary medical technology students in both classroom and laboratory settings and will also be involved in advising and recruitment events.

If you are interested in applying for the position, more details can be found by following the link below.
